

# AMERICAN SHORTHAIR

## GENERAL STANDARD

*The American Shorthair is a true breed of working cat. The conformation should be adapted for this with no part of the anatomy so exaggerated as to foster weakness. The general effect should be that of a strongly built, well balanced, symmetrical cat with conformation indicating power, endurance, and agility.*

**HEAD:** large, with full-cheeked face giving the impression of an oblong just slightly longer than wide. Sweet, open expression. Viewed from front, head can be divided in two equal parts; from base of ears to middle of eyes and from middle of eyes to chin tip. The forehead, when viewed in profile, forms a smooth, moderately convex continuous curve flowing over top of head into neck. Viewed from front, there is no dome between ears.

**EARS:** medium size, slightly rounded at tips and not unduly open at base. Distance between ears, measured from lower inner corners, twice distance between eyes.

**EYES:** large and wide with upper lid shaped like half an almond (cut lengthwise) and lower lid shaped in a fully rounded curve. At least width of one eye between eyes. Outer corners set very slightly higher than inner corners. Bright, clear and alert.

**NOSE:** medium length, same width for entire length. Viewed in profile, gentle concavely curved rise from bridge of nose to forehead.

**JAWS:** strong and long enough to successfully grasp prey. Both level and scissors bites considered equally correct. (In level bite, top and bottom front teeth meet evenly. In scissors bite, inside edge of top front teeth touch outside edge of lower front teeth.)

**MUZZLE:** squared. Definite jowls in mature males.

**CHIN:** firm and well-developed, forming perpendicular line with upper lip.

**NECK:** medium in length, muscular and strong.

**SIZE:** medium to large. No sacrifice of quality for the sake of size. Females may be less massive in all respects than males and should be rewarded equally if overall balance is correct.

**PROPORTIONS:** slightly longer than tall. (Height is profile measure from top of shoulder blades to ground. Length is profile measure from tip of breastbone to rear tip of buttocks.) Viewed from side, body can be divided into three equal parts: from tip of breastbone to elbow, from elbow to front of hind leg, and from front of hind leg to rear tip of buttocks. Length of tail is equal to distance from shoulder blades to base of tail.

**BODY:** solidly built, powerful, and muscular with well-developed shoulders, chest, and hindquarters. Back broad, straight and level. Viewed in profile, slight slope down from hip bone to base of tail. Viewed from above, outer lines of body parallel.

**LEGS:** medium in length and bone, heavily muscled. Viewed from rear, all four legs straight and parallel with paws facing forward.

**PAWS:** firm, full and rounded, with heavy pads. Toes: five in front, four behind .

**TAIL:** medium long, heavy at base, tapering to abrupt blunt end in appearance but with normal tapering final vertebrae.

## SPECIFIC TABBY PATTERN DESCRIPTIONS

**CLASSIC TABBY PATTERN:** *markings dense, clearly defined, and broad. Legs evenly barred with bracelets coming up to meet the body markings. Tail evenly ringed. Several unbroken*

necklaces on neck and upper chest, the more the better. Frown marks on forehead form an intricate letter "M." Unbroken line runs back from outer corner of eye. Swirls on cheeks. Vertical lines over back of head extend to shoulder markings which are in the shape of a butterfly with both upper and lower wings distinctly outlined and marked with dots inside outline. Back markings consist of a vertical line down the spine from butterfly to tail with a vertical stripe paralleling it on each side, the three stripes well separated by stripes of the ground colour. Large solid blotch on each side to be encircled by one or more unbroken rings. Side markings should be the same on both sides. Double vertical rows of buttons on chest and stomach. Hocks: to be the same colour as markings.

**MACKEREL TABBY PATTERN:** markings dense, clearly defined, and all narrow pencillings. Legs evenly barred with narrow bracelets coming up to meet the body markings. Tail barred. Necklaces on neck and chest distinct, like so many chains. Head barred with an "M" on the forehead. Unbroken lines running back from the eyes. Lines running down the head to meet the shoulders. Spine lines run together to form a narrow saddle. Narrow pencillings run around body. Hocks: to be the same colour as markings.

**PATCHED TABBY PATTERN:** a patched tabby (torbie) is an established silver, brown, or blue tabby with patches of red and/or cream.

**BROWN PATCHED TABBY:** ground colour brilliant coppery brown with classic or mackerel tabby markings of dense black with patches of red and/or cream clearly defined on both body and extremities; a blaze of red and/or cream on face is desirable.

**Lips and chin:** the same shade as the rings around the eyes.

**Eye colour:** brilliant gold.

**BLUE PATCHED TABBY:** ground colour, including lips and chin, pale bluish ivory with classic or mackerel tabby markings of very deep blue affording a good contrast with ground colour. Patches of cream clearly defined on both body and extremities; a blaze of cream on the face is desirable. Warm fawn overtones or patina over the whole.

**Eye colour:** brilliant gold.

**SILVER PATCHED TABBY:** undercoat white, ground colour, including lips and chin, pale silver with classic or mackerel tabby markings of dense black with patches of red and/or cream clearly defined on both body and extremities. A blaze of red and/or cream on the face is desirable.

**Eye colour:** brilliant gold, green or hazel.

**SILVER TABBY** (classic, mackerel): ground colour, including lips and chin, pale, clear silver. Markings dense black. The silver tabby genetically is a shaded cat expressing the agouti pattern, therefore the undercoat should be white.
